

PRODUCT SHEET

BRIDGE GUARD DAV H2/W3

W3The newly developed bridge guard, DAV H2/W3 is CE marked according to European standards and meets the requirements of EN 1317-2 and En 1317-5.

- With a sceptre distance of 3.0 meters, the bridge guard can be mounted on bolt groups with or without tamping.
- The bridge guard can be mounted with or without B-profiles completely according to the customer's wishes, and with or without filling rods.
- All reject beams are horizontal and have a built-in deformation bracket, which ensures an ASI value B.
- The A-bracket ensures power transmission. The railing is at least corrosion protected to C3.
- Bolts are provided with rounded heads to avoid protruding edges.

The Bridge Guard is not CE marked

- with lengths $\leq 36,6$ m.
- up to radius < 100 m.
- at descents and at mounting on foundations

DAV H2/W3 is used on bridge constructions where regular requirements are set for a CE marked bridge guard.
