

DAV NORDIC A/S DELIVERS MASSIVELY FOR THE NEW HOLSTEBRO HIGHWAY

For the past three years, DAV NORDIC A/S has delivered massively to the new highway between Herning and Holstebro. On May 28th, the first two stages of a total of 10 km, called the “Messemotorvejen” opened and housing minister OleBirk Olesen is pleased that road users are now enjoying the first part of the highway.

The Road Directorate is building a 39-kilometer highway between Herning and Holstebro. The purpose is to provide road users with a faster and safer roads and better traffic opportunities for the new super hospital in Gødstrup. The pressure of local roads for heavy traffic and noise has also weighed heavily.

The first stage, which has been nicknamed the Messemotorvej, goes from Snejbjerg to Sinding and has just opened. Good cooperation with M. J. Eriksson A/S

M. J. Eriksson A/S is the main contractor for the enterprise and project manager at DAV NORDIC A/S, Bjørn Lyng states: “We have had a really good collaboration with M. J. Eriksson. There has been a mutual respect and understanding of each of our competences and good communication that has ensured that we finished on time.”

32 km crash barrier

DAV NORDIC A/S has delivered and installed approx. 32 km of crash barrier for the two stages and previously delivered and fitted bridge guards for all bridges on the enterprise. The foundation for the highway on these contracts is tougher than usual but due to good preparation and extensive experience, it has not delayed DAV NORDIC A/S in the assembly.

DAV NORDIC A/S is the leading provider of road safety for the Danish roads and has been around for more than 90 years. We employ 60 employees and have offices in Silkeborg, Bjæverskov and Jönköping in Sweden.

DAV NORDIC A/S DELIVERS TRAFFIC SAFETY

DAV NORDIC A/S is one of Denmark's leading road safety suppliers. With more than 90 years of experience, we have designed, developed and delivered road safety to the Danish roads. In 2017, we established a branch in Sweden and took over the management of the sister company, MILEWIDE. This means that we can offer both products in road safety and road equipment and thus be an even stronger advisor to the Road Directorate, the Danish municipalities and contractors throughout the country.

Extensive product palette

Our product range is comprehensive and includes steel, concrete and wood guardrails, bridge guardrails, bridge railings, energy-absorbing terminals, noise screens, portals, traffic protection and traffic modules. We are a recognised supplier of road safety and only lead quality products. We are part of the Contraffix A/S group.

Leading suppliers in Europe and the United States

We manufacture a number of our concrete and steel products ourselves, and therefore supply solutions from the leading road safety suppliers in Europe and the United States.

We assemble the solutions ourselves and have many years of experience in providing solutions that are easy to maintain and meet the required safety standards.

Specially trained employees

We have a high seniority among our employees and all our installers are specially trained and have participated in courses that qualify them to work on the Danish roads and the Danish railway network. We continuously ensure that our installers are trained and familiar with applicable legislation.

Road repairs

We respond at short notice to collisions and damage to our products and solutions. A service that ensures that the traffic is quickly normalised and the road users can drive safely on the roads again.
