

BIKE COVERS

Customized with sedum,
thermo roof, or wood trim

DAV NORDIC supply covers for bike parking,
charging stations, covered walkways, and
parking space covers.

All solutions come with optional thermo roof,
sedum roof, or solar roof.

Harmonious and light cover with focus on functionality

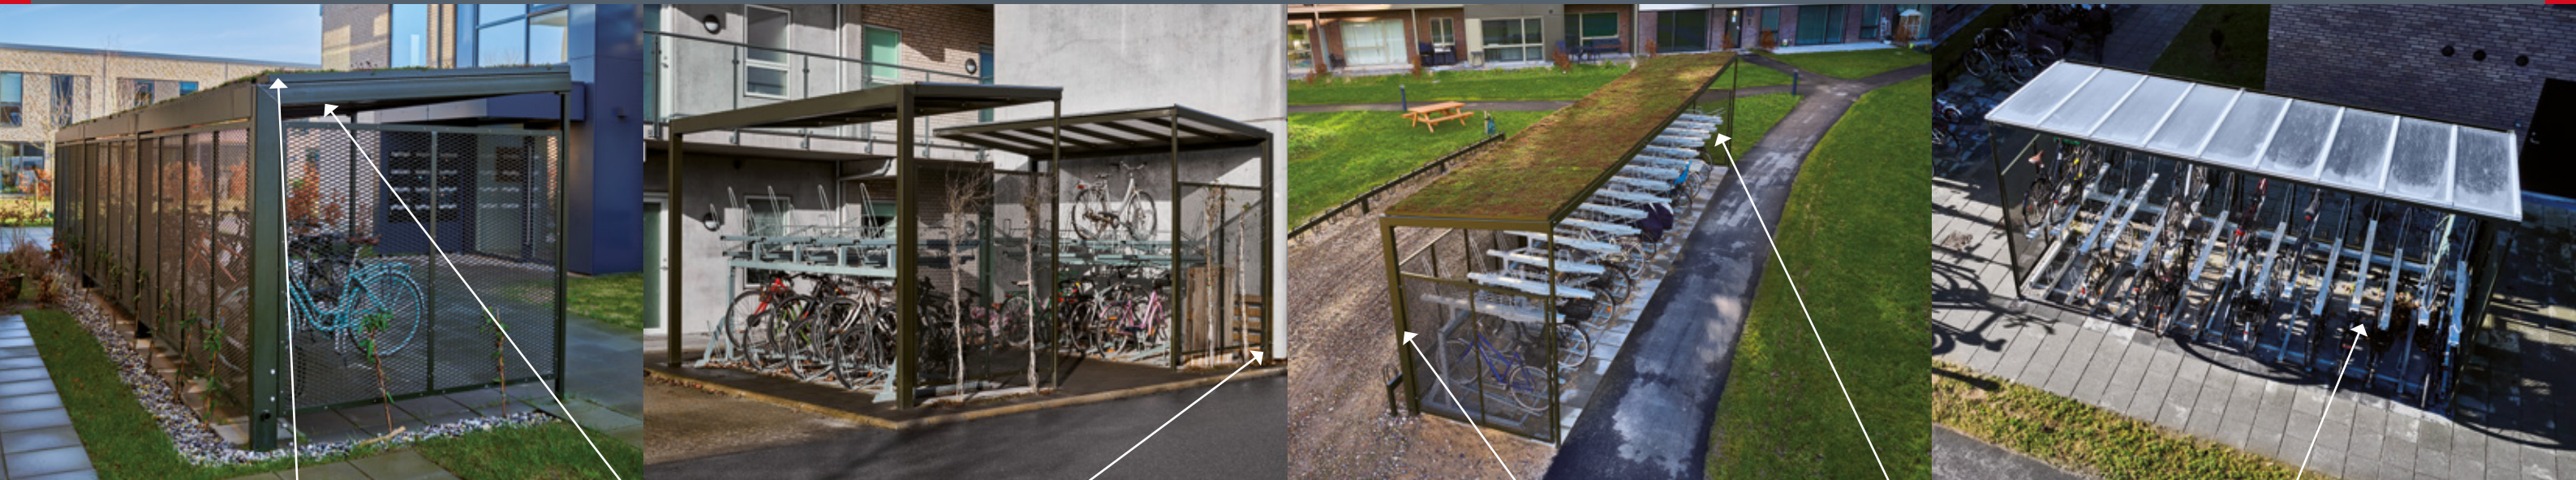

The covers from DAV NORDIC have a simple and elegant design that easily integrates the necessary needs.

By choosing our covers, you ensure a uniform and recognizable appearance.

The design language focuses on clean lines and an understated lightness so that the construction appears harmonious and calm. The design makes parking your bike a pleasure and the construction supports the function.

The cover is a light and stylish Y-shaped construction in

steel. Furthermore, can the construction be adapted to the individual project. The covers come in both a double-sided and a single-sided edition. Both can be wall mounted or freestanding. They can both be fitted with bike stand in either one or two levels.

SUSTAINABLE CHOICE

Sedum roof is a sustainable choice in several ways.

The production leaves only a small CO2 footprint and the planting increases biodiversity. In addition, the plants retain water so much that drainage can be reduced by up to 50%.

INTEGRATED LIGHTING AVAILABLE

Lights under the cover increases safety and security for users. Therefore, there are different ways to mount and integrate lighting into the covers.

For example, lighting can be integrated in the form of a luminaire with the same dimensions as the roof. The choice is entirely up to the customer's preferences.

INTERNAL DRAINAGE SYSTEM

One of the pillar posts hides an integrated drainage system. The solution is intended for drainage running out from under the pillar post with concealed connection to the area's drainage system. As for the roof, the centered gutter has a convenient width designed for manual cleaning.

CONSTRUCTION AND SURFACE TREATMENT

As standard, covers from DAV NORDIC are delivered in a hot-dip galvanized steel version.

The combination of steel with surface treatment makes the product extremely resistant and reliable.

If preferred, the construction "can be painted" in an optional RAL color with an anti-graffiti surface.

CASING

The covers can be equipped with different side parties, either open or covered with a thin metal grill. Additionally, it's also possible to case the side parties with either wooden slats or a trellis. All solutions with sides can be used as support for climbing plants.

GARBAGE BIN COVERS

Besides providing cover for bikes, the covers can also be used as garbage bin covers.

Designed in accordance with your preferred size, the garbage bin covers come in either open or closed constructions.

By choosing similar covers for both bikes and garbage bins, the area gains a more uniform and cohesive look.

DAV NORDIC also deliver covers or charging stations.
These solutions come with the option of integrating solar panels as the roof of the construction.

About DAV NORDIC A/S

DAV NORDIC A/S has more than 90 years of experience in delivering and assembling products and solutions for infrastructure projects and construction in Denmark and Sweden. We are the market leaders in road safety, light poles, and noise reduction solutions. Furthermore, DAV NORDIC A/S deliver and assemble quality steel solutions for construction and have a light pole department with a wide range of products, ranging from steel pole to givable aluminum poles as well as specially designed poles. In addition, we have a large assembly department that, among other things, maintains 80% of the Danish roads.

We insist that our services create the greatest possible value for our customers and the foundation is credibility, thoroughness, and high quality. We have a strong culture and competent employees with many years of experience. The company is 100% Danish owned by Troldhøj Holding A/S and is part of the Troldhøj concern together with 8 other Danish companies.
