

CONCRETE CRASH BARRIER DAV NORDIC

Type BDK 2.1

DAV NORDIC invented the concrete guardrail in the 1930s and still supplies it today.

Type BDK 2.1 is used as a side guardrail and is particularly suitable in locations where a more traditional or idyllic appearance is desired. Examples include forest areas, old farms/castles, and village ponds.

We both sell and install the guardrail, and we can also replace existing concrete guardrails with steel guardrails.
